Borderless Tech Teams

## Abdel

SENIOR FULLSTACK DEVELOPER

Abdel is a Full Stack Developer with **5+ years of experience** in scalable web solutions across diverse tech stacks. He has led high-traffic e-Commerce re-development, deploying on AWS with Docker and Kubernetes.

Experienced in automated testing, he has built solutions for finance, healthcare, and industrial sectors, including an e-health platform and a modular ERP with micro-services. Abdel excels in Agile environments, mentoring junior developers and fostering effective remote communication.

### TECH STACK

**Programming Languages:** Python, JavaScript, TypeScript, C#, Java, SQL

**Backend Frameworks and Libraries:** NestJS, FastAPI, Flask, Express.js, .NET Core

**Frontend Frameworks:** Angular, React, Vue.js, Next.js

**Testing Tools:** Selenium, Pytest, Unittest, xUnit, Jest, Mocha

**Version Control and CI/CD:** GitLab CI, Jenkins, Bitbucket, GitHub

**Cloud and Containerisation:** AWS (EC2, S3, RDS), Docker, Kubernetes, Azure, GCP

**Authentication and Security:** Keycloak, SSO integration

**Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Firebase

**API and Documentation Tools:** Swagger, REST, RabbitMQ

**Project Management and Agile Tools:** Jira, Agile/Scrum practices, Code Reviews

### Biggest achievement

Leading the redevelopment of a major e-commerce platform, where he transitioned the system from a .NET to a Python-based stack, significantly enhancing its performance and scalability. This project involved deploying applications on AWS with Docker and Kubernetes, implementing CI/CD pipelines, and establishing automated testing strategies. His leadership, combined with mentoring junior developers and collaborating in Agile processes, underscores his expertise in scalable, cloud-based e-commerce solutions.
