

Candidates

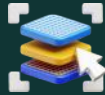

Borderless Tech Teams

Fred

SENIOR FULLSTACK DEVELOPER

Fred is an experienced Full Stack Developer and Engineering Leader with **over 14 years** in scalable application development across diverse tech stacks. Proficient in Python/Django, Node.js, React, and TypeScript, he has led teams in high-growth startups, focusing on A/B testing, feature development, and mentorship. Frederico's background includes co-founding startups, building MVPs, and hands-on mobile and web development. Skilled in cloud tech, especially AWS and Docker, he's adept at cloud deployments and has some Kubernetes experience. Known for Agile practices and servant leadership, he thrives as a collaborative team player in remote environments.

TECH STACK

Programming Languages: Python, JavaScript, TypeScript, C#, Go, Ruby on Rails, PHP, SQL

Backend: Node.js, NestJS, FastAPI, Django, Flask, .NET Core

Frontend: React, React Native, Next.js, Angular

Testing: Selenium, Pytest, Unittest, xUnit, Jest

CI/CD & Version Control: GitLab CI, Jenkins, Bitbucket, GitHub

Cloud/Containerisation: AWS, Azure, Docker (strong), Kubernetes (learning)

Databases: PostgreSQL, MongoDB, MySQL, SQLite

API and Documentation: REST, RabbitMQ, Swagger

Agile & Collaboration Tools: Jira, Slack, Agile/Scrum practices

Biggest achievement

Fred's most notable achievements are in his co-founding and leadership roles, where he directed technical strategy, led MVP development, and managed the transition from startup to scaling phases. As a CTO and co-founder, he oversaw white-label mobile and web solutions, ensuring technical robustness and supporting investment documentation—a rare blend of technical and business strategy. In another role as Head of Engineering, he built the MVP from scratch and prepared the company for scaling and investment, demonstrating a full-spectrum approach from hands-on coding to strategic planning.
