

Candidates

Borderless Tech Teams

Jean

SENIOR FULLSTACK DEVELOPER

Jean is an experienced Software Engineer with over **15 years of expertise** in software architecture, scalable systems, and team leadership. Skilled in both backend and frontend development, he has deep knowledge in Java, PHP, and modern frameworks such as Vue.js and Symfony. In his recent role as Head of Development, Jean oversaw projects, managed a development team, and implemented scalable web solutions using Vue.js and PHP. He brings experience with cloud deployments on AWS, containerisation with Docker and Kubernetes, and agile methodologies, notably Scrum. His collaborative approach and strong foundation in software architecture make him a valuable asset to any technology-driven team. Eager to join a long-term project where he can contribute to both technical strategy and hands-on development.

TECH STACK

Programming Languages: Java, JavaScript, PHP, Golang, C#

Backend: Spring Framework, Symfony, Node.js

Frontend: Vue.js, React, Angular

Testing: PHPUnit, JUnit, Mockito

CI/CD & Version Control: Git, Docker, Kubernetes

Cloud/Containerisation: AWS, Docker, Kubernetes

Databases: SQL, MySQL, PostgreSQL, Oracle, MongoDB

API and Documentation: REST, SOAP, RabbitMQ, Kong Gateway

Biggest achievement ★

Jean's biggest achievement is his leadership in overseeing the **platform migration** and **team management** during his time as Head of Development. He successfully led projects using Vue.js and Symfony, ensuring the scalability and efficiency of web solutions. His focus on **career development** and **1-on-1 mentoring** also contributed to the growth and success of his development team. This combination of **technical strategy** and **people management** highlights his ability to drive both project success and team development, making it a significant achievement in his career.
