Borderless Tech Teams

Leo

SENIOR FULLSTACK DEVELOPER

Leo is an innovative Fullstack Developer with over **six years** of experience, specialising in scalable solutions in dynamic startup environments. He has strong expertise in JavaScript, focusing on TypeScript, ReactJS, and NodeJS, and a proven track record of building impactful solutions across frontend, backend, mobile, and infrastructure. As the founder of a software development agency, he has led foundational projects for multiple startups, helping them grow by building initial product versions and setting up technical frameworks for scalability. Leonardo has experience across diverse industries, delivering projects that include real-time analytics, secure API architectures, and user engagement solutions. In his recent role as Frontend Team Lead and Senior Fullstack Developer, he led the development of seven client-centric applications and a React Native SDK that expanded the client base. His achievements include creating a Video Streaming Service and managing a dashboard to streamline transaction management. Previously, as a co-founder in a security-related startup, he led a team to develop real-time report solutions, demonstrating his versatility and leadership in high-stakes environments.

TECH STACK

Programming Languages: JavaScript, TypeScript
Frontend: ReactJS, NextJS, React Native, Electron
Backend: NodeJS
Databases: PostgreSQL, Firebase, MongoDB
Cloud/Containerisation: AWS, Azure, GCP, Docker, Kubernetes, Redis, Elastic Search

Biggest achievement ⭐

Leo's biggest achievement is the foundation and growth of his agency, where he led cross-functional teams and delivered custom software solutions across various markets. His focus on scalable, secure applications and dedication to quality have set a high standard, positioning him as a trusted technical partner for startups.
