Borderless Tech Teams

Saulo

MID FULLSTACK DEVELOPER

Saulo is an experienced Software Developer with a unique combination of technical expertise, business acumen, and leadership skills. He has a strong background in full-stack development and has held roles that involved team leadership and strategy in both startup and corporate environments. Currently, he works as a Senior Full Stack Engineer, where he applies his technical skills and experience to support development goals. In his previous role as a Senior Software Developer and Frontend Chapter Lead, Saulo led initiatives to optimize workforce management for retail stores across Europe, implementing features that improved sales forecast accuracy and reduced salary costs. He also guided his team through agile transitions and established best practices, including the adoption of TypeScript. As the co-founder and CTO of a technology company, he oversaw the development of numerous projects from concept to completion, managed developer hiring and mentoring, and introduced technologies like React and GraphQL, setting standards for future projects.

TECH STACK

Programming Languages: C#, JavaScript
Frontend: Next.js, React, TypeScript
Backend: Express.js, Node.js
Architecture: Microservices, Event-driven architectures

Biggest achievement ⭐

Saulo's biggest achievement is his work at a workforce management company, where he led projects that impacted over 10,000 retail stores by enhancing sales forecasts and optimizing salary budgets. His leadership in frontend development, agile adoption, and technical improvements underscores his ability to drive both technical and organizational success.
